"ASUENE" and "ASUENE SUPPLY CHAIN" receive SOC 2® Type 2 Report, Reinforcing Security and Trust for Global Enterprises

ASUENE Inc.'s AI Sustainability Integrated Platform "ASUENE" and Supply Chain Management AI Platform "ASUENE SUPPLY CHAIN" have received a "SOC 2 Type 2 Report," which evaluates the effectiveness of internal controls related to security and privacy protection for service organizations based on international standards.

The "SOC 2 Type 2 Report" covers not only the design of controls at a specific point in time but also their operational effectiveness over a specified period. Through this audit, both services underwent an evaluation by an independent third-party auditor regarding the design and operational effectiveness of their internal controls during the specified period.

About SOC 2

"SOC 2 (System and Organization Controls 2)" is an international framework established by the American Institute of Certified Public Accountants (AICPA). It evaluates a service provider's internal controls across five Trust Services Criteria: Security, Availability, Processing Integrity, Confidentiality, and Privacy.

The "SOC 2 Type 2" report verifies that the design of controls related to these categories was operated effectively according to established rules over a specified period.

This evaluation confirmed the operational effectiveness of internal controls across both services, including Zero Trust-based access management, system operations, vulnerability management, and security incident response.

"Type 2" evaluates the operational effectiveness of controls over a specified period. The "SOC 2 Type 2 Report" received this time evaluates the operational status of controls during the target period.

Scope of the Report

- **Target Services:** "ASUENE", "ASUENE SUPPLY CHAIN"
- **Audit Period:** January 1, 2026 – April 30, 2026
- **Report Issuance Date:** July 22, 2026

Background of receiving SOC 2 Type 2 Report

ASUENE's services have been introduced to over 56,000 cumulative companies and are widely utilized to promote decarbonization and ESG management both in Japan and internationally. Particularly for listed companies and global enterprise clients, strong compliance regarding data security and privacy is required not only in financial domains but also in non-financial areas.

In response, ASUENE received the SOC 2 Type 2 Report. During the audit, ASUENE used "Vanta", a compliance automation platform, to streamline security monitoring and evidence collection to ensure continuous control management and provide third-party audit compliance.
