**2/16 月 14:30～17:00** **参加無料**

📍 Tokyo Innovation Base 2F Stage (東京都千代田区丸の内3-8-3)

### **Background of ASUENE’s Participation in the “Tokyo Startup Showcase”**

As regulatory frameworks and disclosure requirements related to corporate carbon emissions continue to expand globally, the measurement and reduction of GHG emissions have become key management challenges for companies. In particular, manufacturing and construction industries are increasingly required to manage emissions across their entire supply chains and to comply with internationally recognized disclosure standards.

At the same time, the availability and maturity of services and consulting support for decarbonization management vary by company size and region. These gaps present challenges for companies seeking to strengthen their global competitiveness and improve their evaluation by international investors. In response, the Tokyo Metropolitan Government promotes the

development and social implementation of startups in the green sector as part of its efforts to build a sustainable industrial structure.

ASUENE has supported corporate decarbonization management in Japan and overseas through its carbon accounting platform “ASUENE” for measuring, reducing, and reporting GHG emissions, achieving the No.1 position in cumulative domestic implementations. Based on this track record and its global business operations, ASUENE has been selected to participate in this event as part of the Green Startup Support Program.

### **ASUENE’s Presentation at the “Tokyo Startup Showcase”**

At the Tokyo Startup Showcase, ASUENE will present case studies of corporate support using its platform “ASUENE,” along with its adoption status in Japan and overseas and its initiatives toward global business expansion.

In addition, as a Japan-born climate tech company, ASUENE will share its approach to entering international markets and its growth strategy through collaboration with overseas companies and investors. The presentation will also address key challenges and future prospects for the social implementation of technologies and services in the green sector, highlighting opportunities for collaboration with corporations, investors, and public-sector stakeholders.

### **About “GLOBAL × SCALEUP TOKYO SU ecosystem: Global VC Insights & Startup Showcase”**

“GLOBAL × SCALEUP TOKYO SU ecosystem: Global VC Insights & Startup Showcase” is an official program of SusHi Tech Tokyo 2026 – Gathering Day. The event consists of “Global Strategy Talk,” a session examining the Tokyo metropolitan startup ecosystem from the perspectives of international venture capital firms and global corporate venture capital investors, and the “Tokyo Startup Showcase,” where selected startups present their business progress and initiatives.

The event brings together startups seeking global expansion, fundraising, and corporate partnerships with corporations, investors, and public-sector stakeholders, serving as a platform to accelerate the growth and social implementation of startups from the Tokyo metropolitan area.
